According to the United States Centers for Disease Control and Prevention, Noroviruses affect 23 million Americans on land each year. **HEALTH ADVISORY – Diseases Spread by Mosquito – Chikungunya:** In order to reduce the risk of contracting any number of diseases spread by mosquito bite, including Malaria, Dengue Fever (especially in the Dominican Republic, Puerto Rico, India, Mexico, and Haiti), and Chikungunya (especially in Haiti, Dominican Republic, and St. Martin [both French and Dutch sides]), travelers are urged to take precautions to avoid mosquito bites by remaining in well screened or air conditioned areas when possible, by wearing clothing that adequately covers arms and legs, and by applying insect repellent to both skin and clothing. The most effective repellents are those containing DEET at a concentration of 20-30%. Although mosquitoes may bite at all times of the day or night, there are two peak periods of biting activity – in the morning for several hours after daybreak, and in the late afternoon, for several hours before dark. Mosquito repellent can be purchased in the ship's gift shop.
